Water Infrastructure Group Receives Two Awards for Sewer Rehabilitation

Water Infrastructure Group received a 2010 Australian Concrete Repair Association Award for Excellence for a sewer maintenance hole rehabilitation project for Moreton Bay Regional Council.

The project involved rehabilitation of 75 maintenance holes located across Moreton Bay Regional Council's area of operation.

Brian Mahon, Water Infrastructure Group Manager Construction, said that the 25 mm thick coating of calcium aluminate premix is expected to extend the life of the Moreton Bay Regional Council's assets for a minimum of 50 years.

"Water Infrastructure Group's pipeline maintenance division has developed a very advanced technical methodology and efficient workflow for maintenance hole rehabilitation and I am pleased to see the team's efforts recognised by this award."

Water Infrastructure Group also received a Merit Award for a rehabilitation project in Sydney for two sections of Sydney Water's **Northern Suburbs Ocean Outfall Sewer**. The project used a two part epoxy mortar coating system that Water Infrastructure Group has refined over a number years to be an extremely efficient, reliable and safe option for sewer rehabilitation.

About Water Infrastructure Group

Water Infrastructure Group provides a unique combination of design, build, operate and maintenance services. We offer sole-source accountability for streamlined delivery of sustainable water infrastructure to meet community and business needs.

Our holistic approach to infrastructure delivery results in:

- Award winning innovation
- Reduced costs
- Guaranteed performance
- Individualised solutions
- Comprehensive environmental compliance
- Enhanced risk management

Water Infrastructure Group is an Australian leader in water recycling and Australia's largest supplier of Class A recycled water for farming and residential use. We have led the way with the introduction and regulatory approval of microfiltration technology for water recycling and our innovation and contributions to the water industry have been recognised by Australian and international excellence awards.

We have an extensive track record in the delivery of water and sewage treatment plants and we are one of Australia's leading infrastructure rehabilitation specialists, providing services such as pipeline inspection, assessment, linings, coatings and major valve work.

Formed in 2008, Water Infrastructure Group has over 200 people and combines the complementary skills of the former Earth Tech water projects group with Tyco's Water Technology Australia and Water Services businesses to deliver an expanded range of services that cater for the needs of customers and current developments in the water industry. More information about Water Infrastructure Group can be found at www.wigroup.com.au.

Water Infrastructure Group is a Tyco International Ltd company. Tyco is a diversified, global company that provides vital products and services to customers in more than 60 countries and has 118,000 employees worldwide. More information on Tyco can be found at www.tyco.com.
