

Water Infrastructure Group

A new force in water

Formed in 2008, Water Infrastructure Group combines the complementary skills of the former Earth Tech water projects group and Tyco's Water Technology Australia and Water Services businesses.

Peter Everist, General Manager of the new group, said that Water Infrastructure Group was created to respond to the needs of customers and current developments in the water industry.

"Our business is a unique combination of design, build, operate and maintenance services for water and wastewater infrastructure. We have won Australian and international awards for our design/build projects and we are Australia's most experienced private owner and operator of water recycling schemes, with over 200 km of pipeline networks supplying our 350 customers with over 20 GL of recycled water per year," Peter said.

"Water Infrastructure Group is an Australian leader for pipeline renovation and maintenance. We are Australia's leading specialist for in-situ lining or replacement of existing pipelines, asset management, preventative maintenance and emergency repairs for pipeline systems. We also have specialised workshop facilities to manufacture and prefabricate components for treatment facilities and pipeline systems."

"Our aim is to optimise buildability and operability to maximise the whole-of-life value of the infrastructure we deliver for our clients. Our real world knowledge of how to build and operate infrastructure feeds back to continually refine and improve our design, construction and manufacturing processes," Peter explained.

A Tyco International Company **GROUP**

About Water Infrastructure Group

Water Infrastructure Group's unique combination of design, build, operate and maintenance services provides sole-source accountability for streamlined delivery of sustainable water infrastructure to meet community and business needs.

Our holistic approach to infrastructure delivery results in:

- Award winning innovation
- Reduced costs
- Guaranteed performance
- Individualised solutions
- Comprehensive environmental compliance
- Enhanced risk management

Water Infrastructure Group is an Australian leader in water recycling and Australia's largest supplier of Class A recycled water for farming and residential use. We have led the way with the introduction and regulatory approval of microfiltration technology for water recycling and our innovation and contributions to the water industry have been recognised by Australian and international excellence awards.

We have an extensive track record in the delivery of water and sewage treatment plants and we are one of Australia's leading infrastructure rehabilitation specialists, providing services such as pipeline inspection, assessment, linings, coatings and major valve work.

Some current projects from our portfolio include:

- Adelaide Desalination Pilot Plant
- Barwon Water Biosolids Management Project in Geelong
- Campaspe Water Reclamation Scheme in Echuca
- Eastern Irrigation Scheme in Melbourne
- Mangawhai EcoCare Project in New Zealand
- Moura Wastewater Treatment Plant in Queensland
- Surbiton Park Recycled Water Plant in Melbourne
- Virginia Pipeline Scheme in Adelaide

Water Infrastructure Group combines the complementary skills of the former Earth Tech water projects group with Tyco's Water Technology Australia and Water Services businesses to deliver an expanded range of services that cater for the needs of customers and current developments in the water industry.

Water Infrastructure Group is a Tyco International Ltd company. Tyco is a diversified, global company that provides vital products and services to customers in more than 60 countries and has 118,000 employees worldwide. More information on Tyco can be found at www.tyco.com.
