Water Infrastructure Group awarded major sewer rehabilitation contract in Sydney

Water Infrastructure Group has been awarded a \$5.6 million contract to rehabilitate a large sewer known as the Canterbury Bankstown Submain for Sydney Water.

This challenging project involves the rehabilitation of four sections of the sewer, totalling 2.1 km from High Street, Canterbury to the Wolli Creek Aqueduct in Earlwood in Sydney's south west.

The 1.8 m diameter pipe has significant biogenic acid attack and Water Infrastructure Group will repair the internal surface with their proprietary PVC spiral wound Panel Lok system. The project also includes the rehabilitation of 19 maintenance holes with epoxy.

Water Infrastructure Group project development engineer, Stijn Sampermans, said that he was very pleased that Sydney Water had selected Water Infrastructure Group for the Canterbury Bankstown project.

"This project is a great opportunity for Water Infrastructure Group to showcase our automatic spiral winding technology. Our system has been designed to work in live flows and we expect this innovation to set new production standards for the pipeline rehabilitation industry," Stijn said.

Work commenced March 2011 and is expected to be completed by June 2012.

About Water Infrastructure Group

Water Infrastructure Group provides a unique combination of design, build, operate and maintenance services. We offer sole-source accountability for streamlined delivery of sustainable water infrastructure to meet community and business needs.

Our holistic approach to infrastructure delivery results in:

- Award winning innovation
- Reduced costs
- Guaranteed performance
- Individualised solutions
- Comprehensive environmental compliance
- Enhanced risk management

Water Infrastructure Group is an Australian leader in water recycling and Australia's largest supplier of Class A recycled water for farming and residential use. We have led the way with the introduction and regulatory approval of microfiltration technology for water recycling and our innovation and contributions to the water industry have been recognised by Australian and international excellence awards.

We have an extensive track record in the delivery of water and sewage treatment plants and we are one of Australia's leading infrastructure rehabilitation specialists, providing services such as pipeline inspection, assessment, linings, coatings and major valve work.

Formed in 2008, Water Infrastructure Group has over 200 people and combines the complementary skills of the former Earth Tech water projects group with Tyco's Water Technology Australia and Water Services businesses to deliver an expanded range of services that cater for the needs of customers and current developments in the water industry. More information about Water Infrastructure Group can be found at www.wigroup.com.au.

Water Infrastructure Group is a Tyco International Ltd company. Tyco is a diversified, global company that provides vital products and services to customers in more than 60 countries and has 118,000 employees worldwide. More information on Tyco can be found at www.tyco.com.
